

**Fieldpiece** Professional-grade instruments for field service

# Superheat & Subcooling Just Got Easier

## Introducing the New SSX34: Standalone Superheat & Subcooling for A/C & Refrigeration

- Measures suction or liquid line pressure & temperature to calculate and display superheat & subcooling
- Select R134A, R404A, R410A, or R22
- ATCI pipe clamp thermocouple included
- Dual display
- Can measure vacuum to 29" Hg

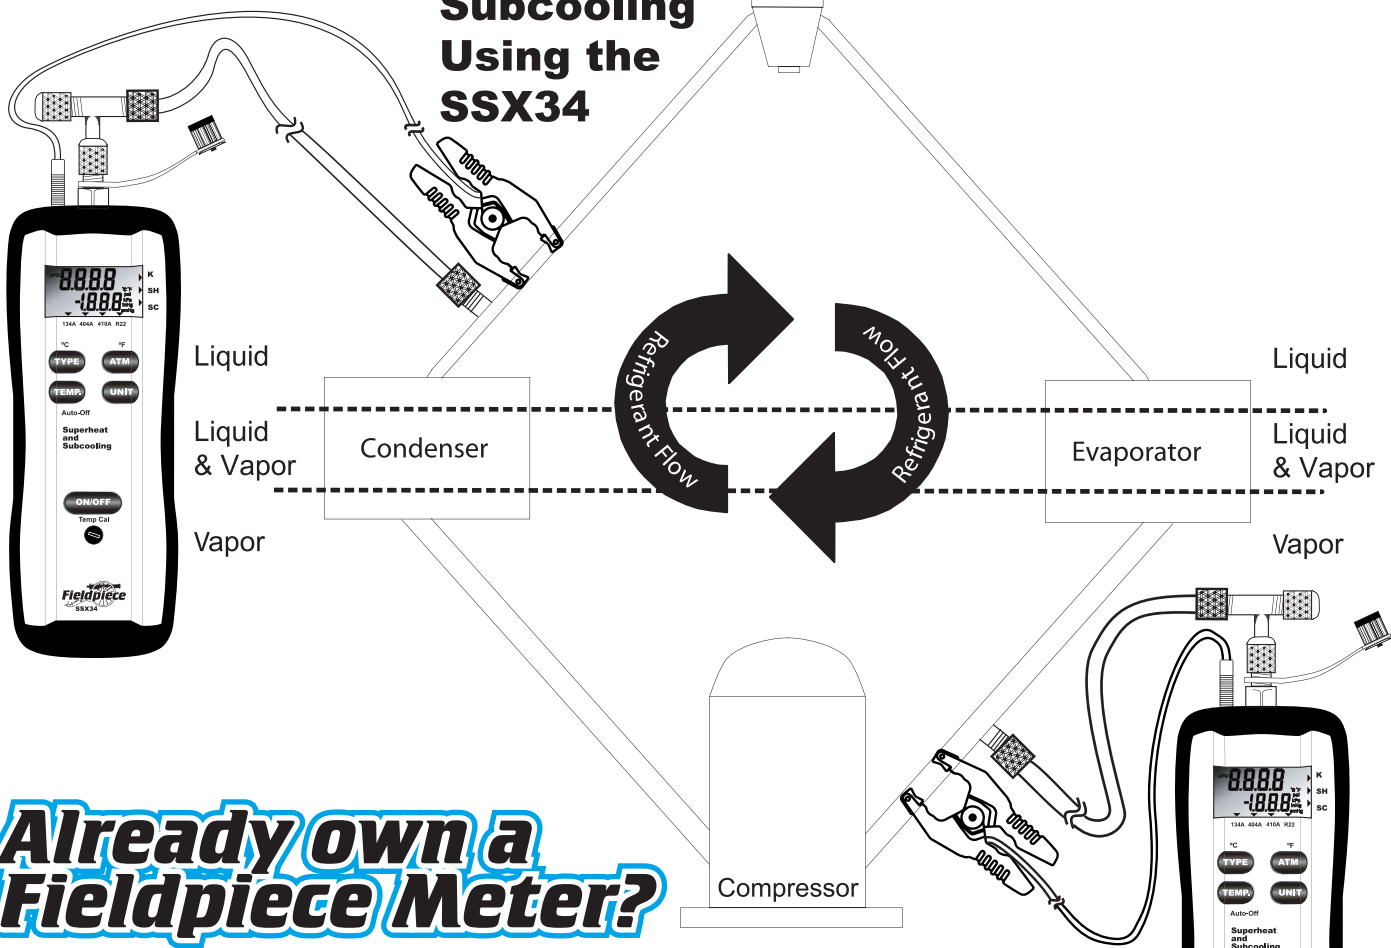

**NO MORE HEADACHES**  
from confusing calculations,  
just take your measurements  
and let the SSX34 calculate  
for you!
