

Hands On CPR & First Aid Training System

#PM001

To anyone responsible for training: stop struggling with scheduling, cost overruns, and retention risks. First Voice has developed a system that will minimize your scheduling inconveniences, improve skill retention, AND reduce your training costs! Using our advanced responder products, you can improve your responder programs, reduce your costs, and keep your responders at nearly 100% skills retention all year long.

Our Hands On CPR and First Aid Training system combines online training with state-of-the-art products to ensure that your responders are always up-to-date and ready for action. Just 15-30 minutes every month guarantees that your responders know how to respond to any emergency. Major training studies show that 15-30 minute interactive training and online classes can be as effective as 4 hours of training.*

Using our online training with the Prestan Hands On CPR Feedback Manikin, First Voice Emergency Instruction Device (EID), the First Voice Training Scenarios Book, and an optional AED trainer upgrade in a convenient carrying case ensures that you are providing your responders with the best training and equipment at the lowest possible cost.

The system comes with a complimentary CPR skills assessment checklist for proper file documentation by your staff and management.

This system is a necessity to shore up OSHA hands-on training requirements when your organization does 100% online training and needs skills assessment verification and practice.

Normal instructor CPR/First Aid class results.

- * *Increases skill retention*
- * *Exceeds OSHA training requirements*
- * *Reduces training costs*

The Emergency Instruction Device

The Emergency Instruction Device (EID; #AVU5001) is the heart of the First Voice products. At only 1.25 inches thick, this new EID is backed by a 3-year warranty on all parts and is patent protected. All protocols are compliant with current approved AHA First Aid and ECC CPR protocols, and this device is updateable. Utilizing yes/no questions quickly gets the trainee through practice training scenarios.

Comes in a soft-sided, light-weight carrying case!

31" x 18" x 6" light-weight carrying case

The Training Scenarios Book

The Training Scenarios Book (#TS001) can be used as needed for a quick anytime training refresher, bringing the instructor to you. Covers medical, injury, and environmental emergencies and ensures skills practice for CPR and a majority of workplace first aid incidences. Comes with quizzes and answer key for your workplace documentation records.

Exceeds OSHA Hands-On Training Requirements

The Prestan CPR Feedback Manikin

Realistic to the eye and the touch, the Prestan manikin (#PP-AM-100M) is unlike any other on the market. Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression and depth. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily. **Includes CPR skills retention checklist documents for your responders!**

HeartSine AED Trainer #HST01

For refresher training on AEDs and sudden cardiac arrest (SCA) events at your organization. **Fits inside the Training System case!**
