

Fixed systems for gas and fire monitoring you can trust

# Gasmonitor Plus

# Gasmonitor Plus

**Gasmonitor Plus is our flexible microprocessor controlled system designed with a modular approach, so you get exactly what you want.**

**Used throughout the world, both on and offshore, Gasmonitor Plus provides the cost effective solution to your system requirements.**

**Gasmonitor Plus, the gas and fire control system you can trust.**

## Simple to use

Gasmonitor Plus offers flexibility whilst still offering simple operation. **All the day to day functions are accessible via push buttons on the front panel.**

As well as a rolling display, indicating the channel currently monitored, each channel has a bar graph display. **This unique bar graph format is ranged to indicate readings below the first alarm setting, providing an instantaneous representation of the gas concentration on every detector.**

Common alarm LEDs on the display card and individual alarms on the panel only light when a hazard or fault is detected. This means **the whole rack status can be checked at a glance.**

## Flexible architecture

Each channel has **three levels of alarm** as well as a **dedicated analogue output**, set as 4-20 mA as standard.

Optional relay modules can interface to the panel to provide up to **a total of 84 output relays per rack**. Sixteen of these relays can be configured/voted from a combination of the three levels of alarm per channel.

The RS232 digital interface provides connectivity with Crowcon's suite of custom designed PC software. Each rack is uniquely addressable, making multi-drop architectures possible. This cuts down on configuration and monitoring cabling.

## Ground breaking design

Gasmonitor Plus is a microprocessor based expandable control system, which **can be multiplied to offer unlimited channels and outputs.**

Its **modular construction** provides **ultimate customisation capacity with minimal wiring.**

Gasmonitor Plus has industry standard analogue outputs, and the mechanical design is based on 19" Eurorack. This means that the **Gasmonitor Plus will integrate fully with existing rack mounted protection systems on site.**

The alochrome finish and rack screening plates ensure that the Gasmonitor Plus is impervious to radio frequency interference.

## Easy maintenance

**Gasmonitor Plus has been designed with easy servicing and maintenance in mind.**

**Each channel is inhibited separately** so that plant safety is not compromised during maintenance checks.

Routine calibration can be achieved from the front panel. The one man calibration feature reduces the service overhead by half.

One universal gas card architecture controls all gas detectors. This **reduces the spares holding** required for Gasmonitor Plus maintenance. **Each control card is fitted with its own dedicated micro-controller so it can function independently** in the event of a single point failure.

Large, clear display

Individual channel alarm inhibits

Channel alarm indication

Unique bargraph reading per channel

Common alarm indicators

Universal gas input cards

Industry-standard gas detectors

Remote reset switch

Dedicated external audio/visual alarm drive

Up to 20 fire/heat detectors per zone

Optional Battery Backup

AC/DC Power Options

Analogue outputs per channel 4-20mA or 1-5Vdc

Common individual channel relays for levels 1, 2, 3 and Fault

Optional voted relays

<b>Gasmonitor Plus</b>		
<b>Size</b>		483 x 133 x 294 mm (19.0 x 5.25 x 11.5 ins)
<b>Weight</b>		9.5 kg (21 lbs)
<b>Enclosure material</b>		Aluminium alloy
<b>Mounting</b>		Rack mounted (3u format) <sup>1</sup>
<b>Channels</b>		16 per rack
<b>Inputs</b>	Gas	2 or 3 wire, 4-20 mA (sink or source), or mV bridge
	<i>Fire - Smoke detectors, heat detectors and manual call points, up to 20 per loop</i>	maximum of 32 loops per rack (i.e. 16 twin zone fire modules)
<b>Outputs</b>	<i>Analogue</i>	16 x 4-20mA, max. load 960 Ohms or 1-5 V, min. load 100 Ohms
	<i>External audio/visual alarm drive</i>	Powered 24 V dc, max load up to 2 A for each alarm level
<b>Relays</b>	<i>Type</i>	Up to 84 DPCO contacts rated 5 A @ 250 V ac, non-inductive load
	<i>Assignment - common - per channel - voting</i>	Alarm 1, Alarm 2, Alarm 3, Fault Gas alarms 1, 2 & 3, fire & fault Up to 16, configurable
	<i>Relay modes</i>	energised, de-energised & latching, non-latching
<b>Digital Communications</b>	<i>DCS/PLC/PC/Local configuration link</i>	RS232
<b>Logging</b>		Built-in datalogger - data available via communication links
<b>Panel indication</b>	<i>Channel number Gas reading Measurement units System fault</i>	4 lines x 20 characters back-lit LCD display as above plus green LED bar-graph ppm, %LEL, %vol, fire yellow LED
<b>Alarm indication</b>	<i>Audible-internal sounder Visual - alarm - fault - inhibit</i>	• 3 individual & 3 common alarms (red LED) individual & common fault (yellow LED) individual inhibit (yellow LED)
<b>Power</b>	<i>AC mains DC Battery backup</i>	100 - 260 V ac 50/60 Hz external 27.6 V dc, 150 W or 300 W External
<b>Remote Accept/Reset</b>		•
<b>Lamp test</b>		•
<b>Approvals</b>	<i>Low voltage directive RF immunity RF emissions</i>	Meets BS EN 61010-1 Meets EN 50082-1 Meets EN 50081-1
<b>Operating Temperature</b>		0 to +50°C (32 to 122°F)
<b>Humidity</b>	<i>0 - 95% non-condensing</i>	•

1. Wall mounted and floor standing cabinets are optional, dimensions on request.
