

605BT Digital Vacuum Gauge

Features:

- Single input with 12000 to 15 micron range.
- Seven units of measure (Microns, PSI, InHg, mBar, Pascals, Torr, mTorr)
- Display - 5 digit.
- Auto Off - Conserve battery power.
- Built in hanging hook and back magnets
- Over pressure protected to 300 psi
- Cleanable sensor

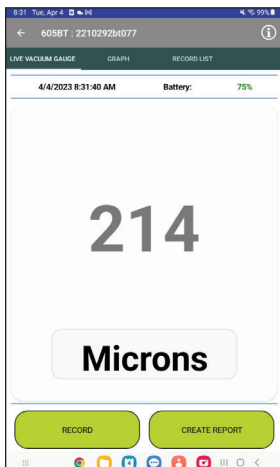

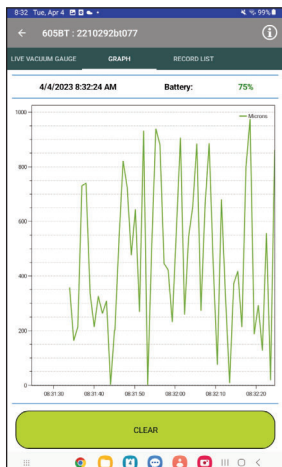

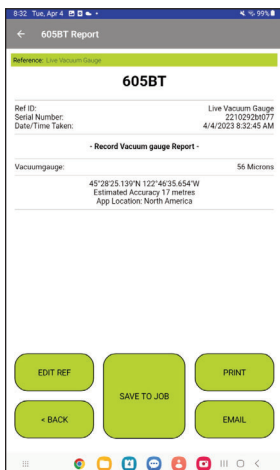

Applications:

- Verify vacuum before charging refrigerant system
- Prevents moisture and air from remaining in the system
- Finds small leaks

TPI Smart Probe App

Use the TPI app to display real time readings and record tests.

The app allows the engineer to create unique jobs & the information to be stored and reports sent via email.

Digital Vacuum Gauge

Specifications	
Measurement Range:	12000 to 15 micron
Display:	5 Digit LCD
Resolution (max):	1 micron
Accuracy:	(+/-10% of reading + 10 digits)
Functions:	Selectable units of measure
Units of Measure:	7 Units (Microns, PSI, InHg, mBar, Pascals, Torr, mTorr)
Battery Type:	9V alkaline
Battery Life:	200 hours (Typical)
Auto Power Off:	10 minutes when measurement is above 12000 microns
Standard Accessories (Included)	9V Alkaline battery (A009A)
Communication	Bluetooth version 4.2 (Use with TPI Smart Probe App)
